

NEUROTRACK

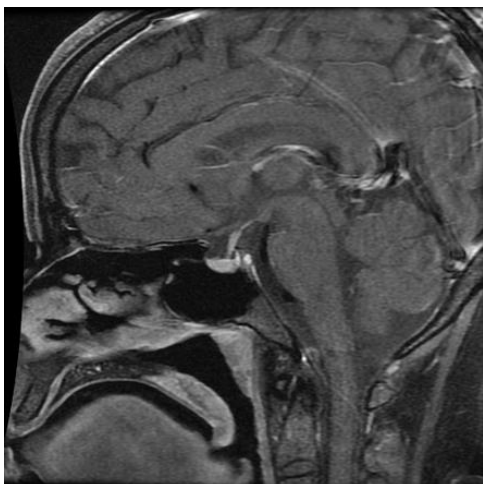

AI-Powered Brain Tumor Detection System
Medical Scan Analysis Report

Report ID:	NT-000004	Report Date:	June 03, 2026 at 11:19 AM
Scan Date:	2026-06-03 15:19:01	System:	NeuroTrack v2.0

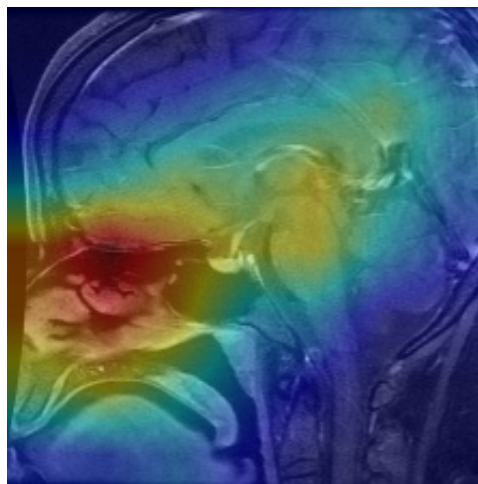

PATIENT INFORMATION

Patient Name:	Maryam Jahangir	Patient ID:	PT-0001
Age:	12 years	Email:	asifkhan@gmail.com
Phone:	Not provided	Registered:	2026-05-19

MRI SCAN IMAGE

Original MRI Scan

AI Attention Heatmap (Grad-CAM)

Left: Original MRI scan uploaded by patient. Right: Grad-CAM heatmap showing AI attention regions (Red = High attention/possible tumor, Blue = Normal tissue).

AI ANALYSIS RESULTS

TUMOR DETECTED

Prediction: PITUITARY

Confidence Score: 99.94%

DETAILED PROBABILITY ANALYSIS

Tumor Type	Probability	Assessment
Glioma	0.0%	Low Risk
Meningioma	0.01%	Low Risk
No Tumor	0.05%	Abnormal
Pituitary	99.94%	High Risk

DOCTOR RECOMMENDATIONS

MODERATE PRIORITY - Consult within 1 week

Recommended Specialists:

- 1. Endocrinologist - For hormone evaluation
- 2. Neurosurgeon - For surgical consultation
- 3. Ophthalmologist - To check vision field defects
- 4. Neurologist - For neurological assessment

Recommended Next Steps:

- Complete hormonal blood tests immediately
- Schedule detailed pituitary MRI
- Visual field testing
- Discuss medication vs surgery options

ABOUT THE DIAGNOSIS

Pituitary tumors form in the pituitary gland at the base of the brain. This gland controls many hormones. Most pituitary tumors are benign and very treatable. Symptoms often include vision problems and hormonal imbalances. Treatment options include surgery through the nose, medication, or radiation.
