

NEUROTRACK

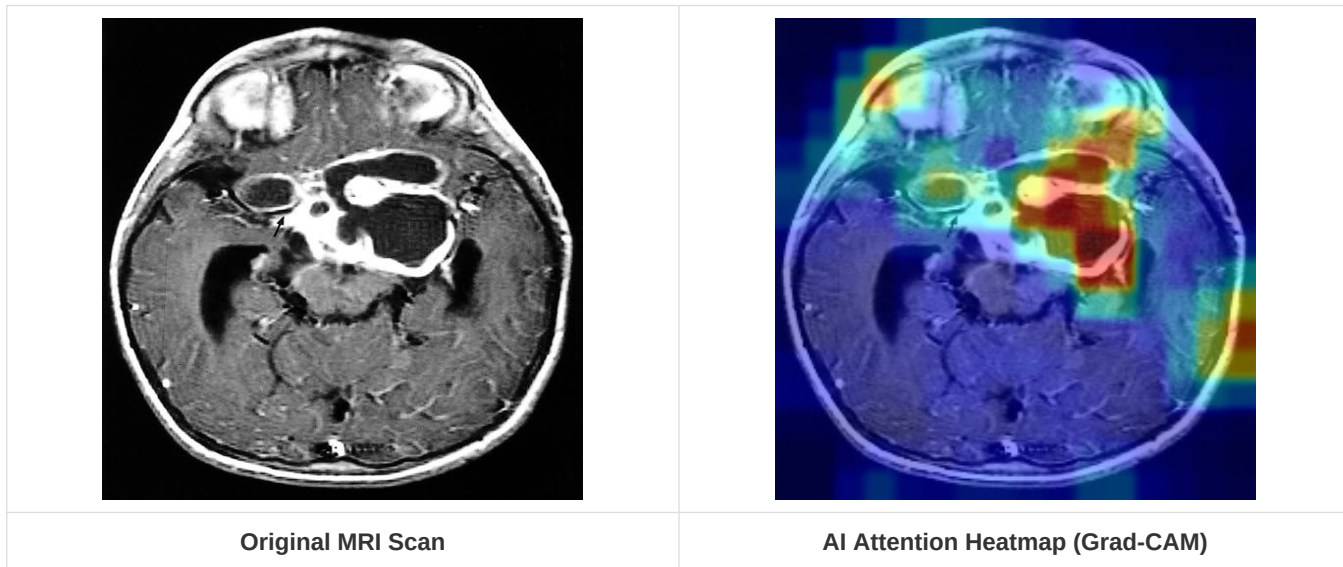

AI-Powered Brain Tumor Detection System
Medical Scan Analysis Report

Report ID:	NT-000041	Report Date:	June 04, 2026 at 03:20 AM
Scan Date:	2026-06-04 07:19:41	System:	NeuroTrack v2.0

PATIENT INFORMATION

Patient Name:	Maryam Jahangir	Patient ID:	PT-0001
Age:	12 years	Email:	asifkhan@gmail.com
Phone:	Not provided	Registered:	2026-05-19

MRI SCAN IMAGE

Left: Original MRI scan uploaded by patient. Right: Grad-CAM heatmap showing AI attention regions (Red = High attention/possible tumor, Blue = Normal tissue).

AI ANALYSIS RESULTS

NO TUMOR DETECTED

Prediction: NOTUMOR

Confidence Score: 97.41%

DETAILED PROBABILITY ANALYSIS

Tumor Type	Probability	Assessment
Glioma	0.0%	Low Risk
Meningioma	2.54%	Low Risk
No Tumor	97.41%	Normal
Pituitary	0.05%	Low Risk

DOCTOR RECOMMENDATIONS

LOW PRIORITY - Routine follow-up

Recommended Specialists:

- 1. Primary Care Physician - For routine checkup
- 2. Neurologist - If symptoms persist

Recommended Next Steps:

- Continue regular health checkups
- Maintain healthy lifestyle
- Report any new neurological symptoms promptly
- Follow-up MRI in 12 months if recommended

ABOUT THE DIAGNOSIS

No tumor was detected in this MRI scan. The brain appears normal without any visible masses or abnormalities. This is a positive finding. Continue regular health monitoring as recommended by your physician.
